Emergency Assistance/ Toilet Alarm Controller

Compliant to BS8300-2:2018

The 4-way toilet alarm control panel (the DTA4) is the latest addition to our DTAKIT range of products.

Simply connect the new panel to up to four assistance/toilet alarm kits for an easy to operate alarm system.

A stylish product with a full range of functions, including fault monitoring.

Watch a video review of the DTA4 & DTAKIT.

CONTROL PANEL:

- Simply connect to up to four emergency assistance/ toilet alarm kits (see right) for a fully compliant - and monitored - assistance alarm system.
- Panels can be daisy-chained to add more alarm kits from one mains connection.
- The controller features both visual and audible indications of an incoming call.
- Each alarm point is clearly indicated on the panel, with space for the user to add individual zone labelling.
- The panel has four 'call acknowledge' buttons and incoming call LEDs - one for each alarm point connected.
- When the relevant 'call acknowledge' button is pressed on the panel, the caller will notice audible and visual changes to the alarm indicators, thus providing reassurance that help is on the way.
- In addition, the system has a programmable alarm 're-sound' feature. This will operate if a call has been acknowledged at the control unit, but is not reset at the point of call within the specified time.
- A separate relay output enables connection to an external beacon - allowing the opportunity to add a remote indicator to alert staff in a different area.
- The unit has a built-in mains power supply and an LED to confirm that the system is powered and available for use.
- The system is monitored and will indicate a short or open circuit condition. The display will also show which alarm point is at fault.

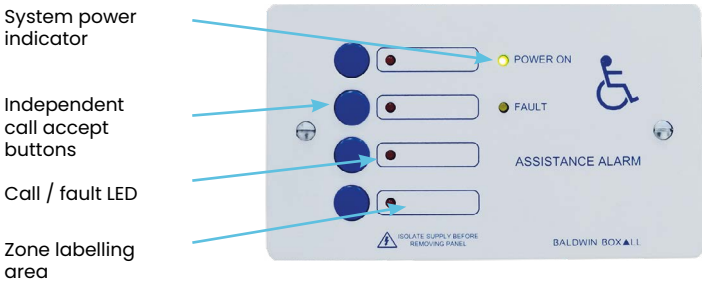

- As with all our toilet alarm products, the control unit is available with a white or stainless steel finish.
- For ease of installation, the panel fits into a standard double gang back box (not supplied).
- Compatible with all DTAKIT assistance call options, including the IP65 rated products.
